

OPTIONAL LED LIGHTING KITS

Not everyone needs optional LED Lighting Kit(s) for their Notice Boards, but in certain circumstances they can significantly enhance the look and the effectiveness of displays.

A 'Lit' Notice Board will also extend the number of hours in a day that a Notice Board can be effective, which is especially important where key messages and promotions need to be communicated in high footfall areas during the evening – for example; near Restaurants, Theatres, Clubs, or in Town/City centres.

POWER USAGE

LED lighting is relatively low cost, but when used in conjunction with a timer unit (through the power supply – not supplied), energy waste can be further minimised, by setting specific lighting times and avoiding power wastage outside of effective hours of use.

INSTALLATION

LED lighting kits require a power supply to the site of the notice board, which should always be installed or connected to, by a qualified electrician.
